A-12 to A-12A-2 Replacement UPDATE 5/27/2020

Not much new on the project this week. Trenching is slow due to the depth and the myriad shallow utilities that the crew is dealing with.

Friday, May 22 the crew achieved no production due to a blockage in the main that was unrelated to the construction of the replacement. The blockage has been removed and normal flow was reinstated over the long holiday weekend.

The crew will continue to backfill behind the trench and reconstruct the alley roadbed with 18" of class 6 road base.

Stutsman Gerbaz Earthmoving's on-site supervisor is Jesus Lopez: 970-366-0413. Shay Stutsman, Owner/President may be reached at: 970-379-0040.

Updates on the project may be found on our website: www.aspensan.com For specific correspondence and updates for affected residents you may email Hamilton Tharp, Collection System Superintendent, at: a12replacement@gmail.com or phone: 970-429-5411

Please stay safe and healthy!
