

## A-12 to A-12A-2 Replacement UPDATE 3/19/20

***The public meeting for residents or their representatives affected by this sanitary sewer line replacement that was scheduled for Friday March 20, 2020 at 4:00 pm at the District offices has been cancelled due to ongoing concerns about COVID 19 and the CDC's recommendations for limiting contact.***

Weather dependent, crews from Stutsman Gerbaz Earthmoving (SGE) may mobilize in to the alley ROW the week of March 23 and begin conducting pot-holing operations. Pot-holing is a process of excavating small, specific holes to establish the lateral and vertical location of existing utilities. Crews will use a hydro-vacuum (excavating the dirt with high pressure water and vacuuming the loose spoils away) to minimize the risk of damage to the utilities. Utility line locators and a survey crew may also be on site. The hydro-vacuum will create some noise, but the operation will move along to different spots throughout the site.

Stutsman Gerbaz Earthmoving's on-site supervisor is Jesus Lopez: 970-366-0413. Shay Stutsman, Owner/President may be reached at: 970-379-0040.

Updates on the project may be found here on our website. For specific correspondence and updates for affected residents you may email Hamilton Tharp, Collection System Superintendent, at: [a12replacement@gmail.com](mailto:a12replacement@gmail.com) or phone: 970-429-5411
