

SAFE FLUSHING REMINDER

The Aspen Consolidated Sanitation District would like to remind everyone that even during this COVID-19 pandemic, there is no such thing as a “flushable wipe”.

Though it may be tempting to flush items that one considers contaminated, anything other than toilet tissue can cause serious blockages in the wastewater system. Items like:

- **Hand Wipes**
- **Diapers**
- **Paper Towels**
- **Dental Floss**
- **Feminine Hygiene Products**
- **Latex, Nitrile or Vinyl Gloves**
- **Manufactured or Temporarily Fashioned Face Masks**

Should be properly disposed into the trash.

The sewer blockage you prevent may be your own.

Please stay safe.
